LP and BV: Met with representatives at the Arecibo landfill about segregating HHW/e-waste that residents bring in. Obtained an access agreement and next week we will set up a temporary staging area to place the HHW/e-waste for EPA/ERRS to pick up

- Assisted at the Arecibo HHW collection event, one resident dropped off 8 HHW items
- Went to one point and collected HHW and e-waste and marked some points near the Arecibo landfill to come back to
- There's a battery recycling facility in Arecibo (The Battery Recycling Co.) that we should check in on

BV: Met with Arecibo's deputy mayor and he mentioned that there are two other collection points (one in Santana and at the Arecibo landfill (operated by Landfill Technologies)) where we could set up pads for the community to access to place their HHW/e-waste.

- Met with the director of the Santana site and there is already an area set up (see attached photos) where they could separate out HHW/e-waste. He took the access agreement and asked us to give a training Monday morning at 8:30, and that he will have the access agreement signed by then
- Checked on the Camuy pad to see whether a pick up is needed (no, it is empty,

see attached picture)
